Session 5. Graphics.
Matplotlib and Seaborn Packages

Assignments

1. Do task 1a or 1b:

   1a. Read the text from the User's Guide "Pyplot tutorial" or https://matplotlib.org/stable/tutorials/introductory/pyplot.html and execute the commands from it.

   1b. Read the text "Quick start guide" https://matplotlib.org/stable/tutorials/introductory/quick_start.html and execute the commands from it.

2. Choose one example from the collection https://matplotlib.org/stable/gallery/index.html. Analyze it and execute the commands from it (explain the code: what the commands do, what the command parameters specify).

II. Pandas Data Visualization

3. Read the text from the User's Guide "Chart visualization" or https://pandas.pydata.org/pandas-docs/stable/user_guide/visualization.html.

III. Seaborn Package

4. Read the text "An introduction to seaborn" https://seaborn.pydata.org/tutorial/introduction.html and execute the commands from it.

5. Choose one example from the collection https://seaborn.pydata.org/examples/index.html. Analyze it and execute the commands from it (explain the code: what the commands do, what the command parameters specify).
